This February 9, 1911, posting with a typewritten return address was franked with a two-cent red Washington stamp perforated with the letters "ALS". The 8½ mm height and the pattern matches perfin pattern A174 listed in *The Catalog of United States Perfins*. While there is no information listed about the user listed in the catalog we should not be hasty

in concluding that the user has been found. In addition to a typewritten return address we are faced with the fact that Griffon Cutlery Works does not translate to "ALS".

A photocopy has been forwarded to John Randall, the US Catalog Editor, for evaluation.
